## EXPERIENCE

### Third and Grove — *Lead Engineer -> Engineering Manager*

<https://www.thirdandgrove.com/>

June 2022 - PRESENT

I joined Third and Grove as a Lead Engineer, responsible for technical guidance and oversight, task prep, and code reviews on their 2 largest support engagements. After being promoted to Engineering Manager in summer of 2023, I became responsible for 6 Engineers and Lead Engineers, 1:1 meetings, employee growth plans, project resource allocation, large-scale estimation and technical discovery, hiring/interviews and emergency support, among working with the VP and Associate Director to develop and refine processes to move the engineering department forward.

### Gravity Works Design & Development — *Senior Developer*

<https://gravityworksdesign.com/>

March 2020 - June 2022

At Gravity Works, I was brought in to be the company's sole back-end Drupal developer and primary subject matter expert, where I was responsible for creating custom features for Drupal sites of varying complexity. Aside from development, I was also responsible for helping establish development/deployment processes and providing mentorship to both Drupal and non-Drupal application developers.

### Acro Media — *Developer -> Team Lead*

<https://www.acromedia.com/>

September 2016 - March 2020

I began at Acro Media on the Managed services team, where I was responsible for support and maintenance development on existing sites (primarily e-commerce), as well as maintaining our internal time logging tool built in React. In March of 2018, I was promoted to a Team Lead and was responsible for leading a team of developers in the Managed Services department. Regular responsibilities included coordinating project development, technical architecture, technical discovery, task delegation, mentorship, performance reviews, training, and coaching.

## PROFICIENCIES

PHP

Drupal

HTML/CSS/JS

Mentorship

Team Leadership

Technical Planning

## ACHIEVEMENTS

Created material and curriculum for a Drupal course offered by Okanagan College.

Technical reviewer for the [Drupal 10 Cookbook](#).

Previous technical experience available upon request.

## NOTABLE PROJECTS

### Cummins, Inc

<https://www.cummins.com>

Technical point of contact and implementation oversight for ongoing support, and multiple other focused projects and initiatives. Internal sales and technical discovery.

### CooperVision

<https://www.coopervision.com>

Oversaw migration of a 40-site multisite instance from Drupal 7 to Drupal 9 in collaboration with a Technical Architect. Technical point of contact and implementation oversight for ongoing support, and multiple other focused projects and initiatives. Internal sales and technical discovery.

### Minnesota State High School League.

<https://www.mshsl.org>

State-wide high school athletics website. Enables school personnel to manage their school, teams, and activities via custom dashboards. Contains a custom lightweight LMS for coaches, including reports and capacity for certifications upon course completion. Other notable features include real-time score display, roster generation, and scheduling via a custom-built integration with rSchoolToday.
